Employer-Reported Workplace Injuries and Illnesses in New York — 2018

Over 140,000 nonfatal workplace injuries and illnesses were reported among New York’s private industry employers in 2018, resulting in an incidence rate of 2.2 cases per 100 full-time equivalent workers, the U.S. Bureau of Labor Statistics reported today. (See [table A](#).) Chief Regional Economist Martin Kohli noted that New York was among 12 states and the District of Columbia that had an incidence rate of total recordable cases (TRC) significantly lower than the national rate of 2.8. (New York was 1 of 41 states and the District of Columbia for which statewide estimates are available. See [Technical Note](#) at the end of this release for more information about the survey.)

New York’s findings from the 2018 Survey of Occupational Injuries and Illnesses include:

- TRC incidence rates in private industry ranged from 0.9 in financial activities and professional and business services to 4.7 in natural resources and mining (See [table 1](#).)
- Two supersectors, with about 43 percent of private industry employment, accounted for 55 percent of the occupational injuries and illnesses: education and health services; and trade, transportation, and utilities. (See [table 2](#).)
- In private industry, the TRC injury and illness incidence rate ranged from 1.2 for establishments employing fewer than 11 workers to 2.6 for establishments employing 50 workers or more. (See [table 3](#).)
- New York’s private industry TRC rate of 2.2 in 2018 was unchanged from 2017. (See [table 4](#).)

Table A. Number and rate of nonfatal occupational injuries and illnesses in private industry, United States and New York, 2018

Characteristic	United States		New York	
	Number (in thousands)	Rate (per 100 workers)	Number (in thousands)	Rate (per 100 workers)
Total cases	2,834.5	2.8	140.2	2.2
Cases with days away from work, job transfer, or restriction	1,578.7	1.6	80.2	1.3
Cases with days away from work	900.4	0.9	72.5	1.1
Cases with job transfer or restriction	678.3	0.7	7.8	0.1
Other recordable cases	1,255.9	1.3	60.0	0.9

Note: Because of rounding, components may not add to totals.

Private industry injury and illness case types

Of the 140,200 private industry injury and illness cases reported in New York, 80,200 were of a more severe nature, involving days away from work, job transfer, or restriction—commonly referred to as DART cases. These cases occurred at a rate of 1.3 cases per 100 full-time workers. Ninety percent of the DART cases in New York were incidents that resulted in at least one day away from work, compared to 57 percent nationally.

Other recordable cases (those not involving days away from work, job transfer, or restriction) accounted for the remaining 60,000 cases in New York, at a rate of 0.9. In comparison, the national rate for other recordable cases was 1.3.

In New York, no private industry supersector had a significant change in the TRC incidence rate or the DART incidence rate from the previous year.

In 2018, approximately 135,200 (96.4 percent) of private industry recordable injuries and illnesses were injuries. Workplace illnesses accounted for an additional 5,100 recordable cases. Four categories—hearing loss, skin disorders, respiratory conditions, and poisoning—accounted for 39 percent of the occupational illnesses in New York and a similar share (38 percent) nationally.

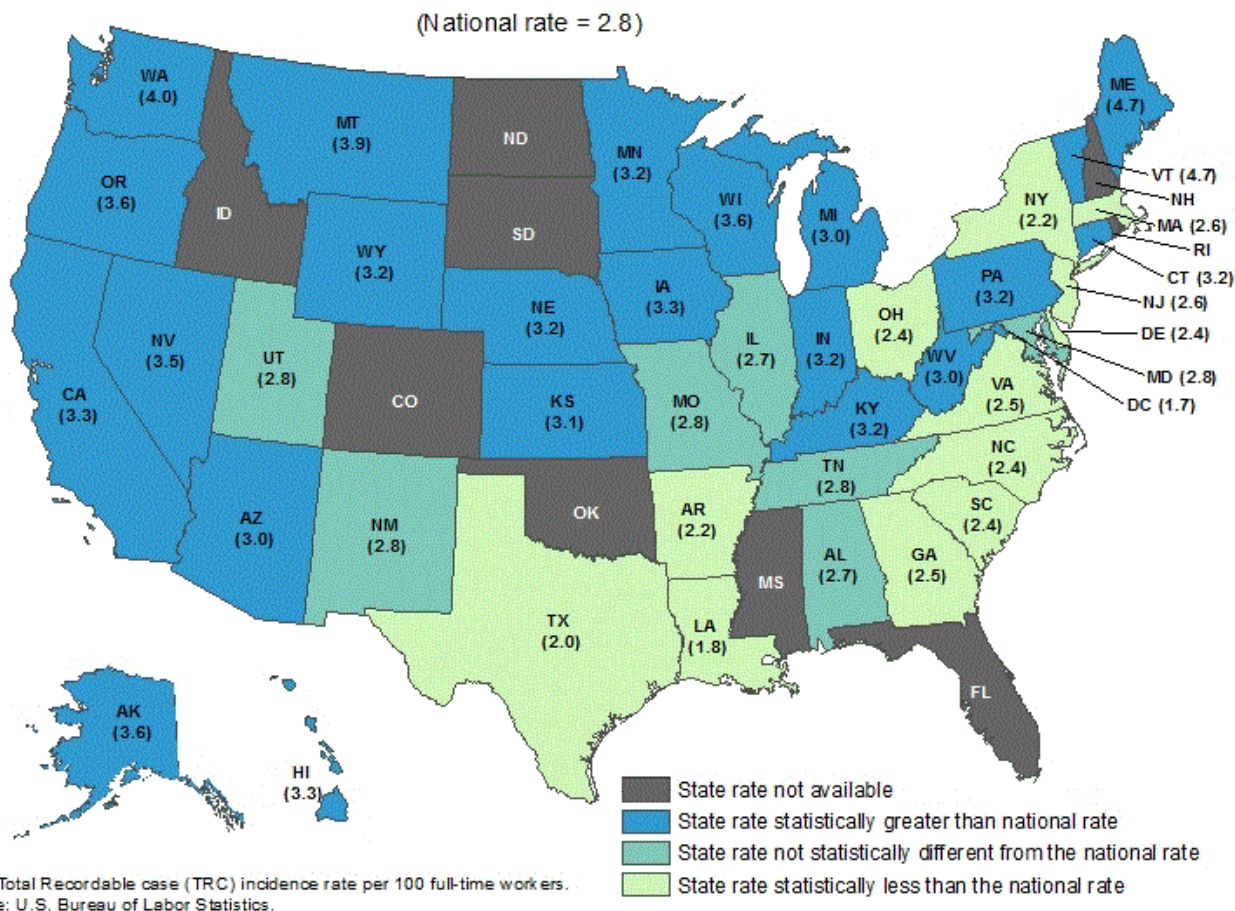

State and local government injury and illness cases

In the state and local government sector in New York, 60,400 injury and illness cases were reported in 2018, resulting in a rate of 6.4 cases per 100 full-time workers. Nationally, the rate was 4.8. Seventy-six percent of injuries and illnesses reported in New York’s public sector occurred among local government workers.

State estimates

Private industry and public sector estimates are available for 41 participating states and for the District of Columbia for 2018 (See [chart 1](#)). The private industry injury and illness rate was statistically higher in 22 states than the national rate of 2.8 cases per 100 full-time workers, lower in 12 states and in the District of Columbia, and not statistically different in 7 states. Caution should be taken when comparing rates among different states as some differences can be attributed to different industry composition within each state.

Chart 1. State nonfatal occupational injury and illness incidence rates, private industry, 2018

Technical Note

The Survey of Occupational Injuries and Illnesses (SOII) is a Federal/State cooperative program that publishes estimates on nonfatal occupational injuries and illnesses. Each year, approximately 200,000 employers report for establishments in private industry and the public sector (state and local government). In-scope cases include work-related injuries or illnesses to workers who require medical care beyond first aid. See the Occupational Safety and Health Administration (OSHA) for the entire [recordkeeping guidelines](#). The SOII excludes all work-related fatalities as well as nonfatal work injuries and illnesses to the self-employed; to workers on farms with 10 or fewer employees; to private household workers; to volunteers; and to federal government workers. For more information on the scope and sampling methodology see the [SOII Handbook of Methods](#).

Additional occupational injury and illness data are available from our regional web page at www.bls.gov/regions/new-york-new-jersey.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202)-691-5200; Federal Relay Service: (800)-877-8339.

Table 1. Incidence rates of nonfatal occupational injuries and illnesses by industry sector and case type, New York, 2018

Industry ⁽¹⁾⁽²⁾⁽³⁾	Total recordable cases	Cases with days away from work, job transfer, or restriction			Other recordable cases
		Total	Cases with days away from work ⁽⁴⁾	Cases with job transfer or restriction	
All industries including state and local government	2.7	1.6	1.5	0.1	1.2
Private industry.....	2.2	1.3	1.1	0.1	0.9
Goods-producing.....	2.8	1.8	1.5	0.3	1.0

Trade, transportation, and utilities	2.6	1.8	1.6	0.2	0.8
Information	1.4	0.8	0.8	(5)	0.6
Financial activities	0.9	0.4	0.4	-	0.5
Professional and business services	0.9	0.5	0.5	(5)	0.4
Education and health services	3.2	1.7	1.6	0.1	1.5
Leisure and hospitality.....	2.8	1.2	1.1	0.1	1.6
Other services, except public administration....	1.6	0.7	0.7	-	0.8
State and local government.....	6.4	3.7	3.7	0.1	2.6
State government	6.3	3.8	3.8	0.1	2.5
Local government.....	6.4	3.7	3.7	0.1	2.7

Footnotes:

(1) Excludes farms with fewer than 11 employees.

(2) Data for mining (Sector 21 in the North American Industry Classification System, 2012 edition) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

(3) Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

(4) Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

(5) Data do not meet publication guidelines.

Note: Because of rounding, components may not add to totals. Dashes indicate data not available.

Incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as: $(N/EH) \times 200,000$ where: N = number of injuries and illnesses; EH = total hours worked by all employees during the calendar year; and 200,000 = base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year).
